Education

Bachelor of Computer Science

DAYANAND PG COLLEGE

Hisar, Haryana

2021 - 24

Profile Summary

- **Aspiring** Full Stack Developer with a solid foundation in HTML, CSS, JavaScript, TypeScript, React.js, Node.js, Express.js, MongoDB, and more.
- Demonstrated expertise in **developing** and optimizing scalable **web applications**, including a social media platform, YouTube clone, airline booking system, and job portal, reflecting strong technical skills and practical experience.
- Skilled in **API integration**, authentication, and **real-time data handling**, ensuring robust application performance and user experience. Experienced in Microservices architecture, showcasing a **commitment** to learning advanced development practices.
- Proven ability in **self-directed** learning, consistently updating my knowledge of the latest web technologies and industry trends. Eager to leverage my skills and project experience in a collaborative environment, contributing effectively to innovative web development teams.

Skills

- **Technical :** Html | Css | Tailwind | Bootstrap | JavaScript | Node.js | Express | MongoDB | React | Redux | NoSQL | Git | TypeScript | GSAP | Backend
- **Other :** API Development, Authentication (JWT)
- **Soft :** Attention to Details | Adaptability | Collaboration | Continuous Learning

Achievements

- **Engineered** a scalable **Full-Stack** Social Media Platform, integrating image and post uploading, liking, commenting, and profile management features, delivering a seamless user experience and demonstrating proficiency in Html, Css, JavaScript, Express, Node.js, and MongoDB.
- **Implemented** a portfolio of animated websites using advanced CSS and JavaScript techniques, significantly increasing personal project visibility and demonstrating a strong focus on design aesthetics and user engagement.
- **Developed** a community-driven platform for college students, using **Next.js**, Tailwind CSS, and TypeScript, enabling users to post anonymously, and ask questions about their surroundings, showcasing expertise in building scalable applications with a focus on user privacy and community-driven features.
- **Optimized** multiple full-stack applications by implementing **API integration**, authentication with JWT, and real-time data handling, resulting in improved performance and a more responsive user experience.
- **Developed** a strong understanding of clean and modular code principles and through real-world projects, enhancing the maintainability and scalability of my applications.

Projects

- **Snapify :** **Developed** a full-stack social media platform featuring real-time interactions, user authentication, image uploads, liking, commenting, and profile management. Focused on optimizing backend scalability and improving **user experience**.
- **Bindass Bol:** Built a community platform for my college students using **Next.js** in **less than 1 month**, that could support thousands of users enabling them to post & share about their surroundings and engage, and **ensure privacy**. Integrated real-time updates for a, user-friendly experience.
- **Backend Of Video Streaming App :** Developed a backend for a video streaming platform using Node.js, Express, and MongoDB. Implemented user authentication, video uploads, and content management. Optimized database queries using **MongoDB aggregation pipelines** for efficient data operations focusing on scalability and maintainable project structure.
- **ezCareers :** Created a job portal enabling users to search and apply for jobs, with features like dynamic user profiles, job listings, and application tracking. In addition, implemented **role-based access** for both job seekers and recruiters.
- **Airline Booking Backend System :** Designed and implemented a **scalable backend system** using **microservices architecture**, with services handling flight bookings, user authentication, and inter-service communication via **RabbitMQ** for improved reliability.
- **Youtube Frontend Replica :** Built frontend of Youtube using React.js that **integrates** with the **YouTube API** to display popular videos, implement a search functionality, and provide a video details page with dummy live chat and comments.
- **Modern Landing Pages & Portfolios :** Designed **responsive** and animated landing pages and portfolios using **modern frontend technologies**, enhancing user engagement and optimizing for fast, cross-device performance.

Core Competencies

Frontend Development | Backend Development | Full Stack Experience | API Development & Integration | Responsive Front-End Design | Version Control | Continuous Learning

Personal Details

- **Date of Birth:** March 27, 2003
- **Languages Known:** English, Hindi.
